Christian Mandujano Borjas

Denver, CO | c.mandujano.borjas@gmail.com | 720.397.7585 | LinkedIn | GitHub

Professional Summary

Analytical and versatile Computer Science graduate specializing in embedded architectures, secure code design, and advanced backend data processing. Former IT Technician combining hands-on systems administration with a deep focus on network integrity and cybersecurity. Skilled in building automated local ecosystems from the ground up to solve complex data challenges.

Education

University of Colorado Denver — Denver, CO
B.S. Computer Science. — *2026*

Experience

IT Professional Level 2 / IT Technician — 2021 – 2024
Monarch Casino — *Black Hawk, CO*

- Installed and maintained critical PC hardware, networking devices, and security infrastructure to maximize uptime.
- Identified and resolved an enterprise Windows environment upgrade issue, saving $46,000 in projected costs.
- Managed network security configurations, backups, and user access control permissions in strict accordance with data privacy policies.

Projects

Desky — 2026 – 2026
Project Lead

- Spearheaded architectural goals focusing on the transition from digital AI models to physical, embodied AI systems.
- Coordinated multi-disciplinary engineering student milestones as part of Senior Design capstone.

Chantico — 2026
Core Developer

- Developed an AI-driven digital guardian designed to parse OPNsense logs for real-time security anomaly detection.
- Integrated switch-level configurations to shield legacy IoT hardware.

Machine Learning for Dungeon Masters (ML-DM) — 2023
Researcher

- Built an AI framework for Dungeon Masters using LangChain, Flask, and an NLP-based interaction loop.
- Leveraged Docker containerization to maintain production parity across testing environments.

Trip Guardian — 2024 – 2024
Creator

- Engineered an AI-driven web tool calculating regional safety ratings and live weather overlays by structuring open public safety datasets.

Baby Weight Prediction — 2023 – 2023
Competitor

- Designed and executed Random Forest and Linear Regression pipelines natively in Rust, achieving a 10% improvement in target RMSLE score benchmarks.

Activities & Leadership

AI Student Association (AISA) — 2024 – 2026
Board Member / Technical Officer

- Directed club technical strategy, evaluated frameworks, and mentored 30 members across coding sandboxes.

Lynx Robotics — 2025 – 2026
Board Member / Secretary

- Governed platform documentation, ran workshops, and translated engineering metrics to stakeholders, contributing to a doubling of membership over a two-year span.

Skills

Languages: Python, Rust, C++, C#, Java, C, SQL, HTML, CSS, JavaScript

Technologies: Docker, Kubernetes, Linux (Arch/Garuda), Ubuntu Server, OPNsense, Tailscale, Raspberry Pi, PostgreSQL, Jupyter

Specializations: Secure Coding, Systems Integration, DevOps, Network Integrity, Infrastructure Automation
